Air conditioning (often referred to as AC, A/C, or air con) is the process of removing heat and moisture from the interior of an occupied space, to improve the comfort of occupants. Air conditioning can be used in both domestic and commercial environments. This process is most commonly used to achieve a more comfortable interior environment, typically for humans and animals; however, air ...

Air conditioning - Wikipedia

AIR "CONDITIONING. Principles and Concepts Air conditioning is the process whereby the condition of Air, as defined by its temperature and moisture content, is changed.

AIR CONDITIONING-PRINCIPLES AND CONCEPTS | Air

Refrigeration is a process of removing heat from a low-temperature reservoir and transferring it to a high-temperature reservoir. The work of heat transfer is traditionally driven by mechanical means, but can also be driven by heat, magnetism, electricity, laser, or other means. Refrigeration has many applications, including, but not limited to: household refrigerators, industrial freezers ...

Design and specification of Variable Refrigeration Flow (VRF) air conditioning systems takes another big step forward with the launch of a new generation software tool from Mitsubishi Heavy Industries Air conditioning Europe (MHIAE). The new version of MHIAE's highly successful E-Solution software includes specification details of the latest KXZ VRF systems.

Engineered Air designs, manufactures and sells heating, ventilating, and air conditioning units, HVAC, from many locations in Canada and the United States of America.

Engineered Air | One of North America's largest fully

Engineered Air's HRP Series is an energy recovery package specifically designed to reduce the high cost of conditioning ventilation air by recovering a significant portion of the thermal energy from the exhaust air. This is accomplished with EngA's QDT Heat Pipe which has a nominal 60% recovery factor. [Learn More](#)
