STEPPING MOTORS , MITSUMI , mitsumi-Any products mentioned in this catalog are subject to any modification in their appearance and others for improvements without prior notification.

STEPPING MOTORS | MITSUMI

Brushed DC motors rotate continuously when DC voltage is applied to their terminals. The stepper motor is known by its property to convert a train of input pulses (typically square wave pulses) into a precisely defined increment in the shaft position.

PI manufactures electromagnetic linear motors and several types of piezoelectric linear motors: Ultrasonic piezo motors (resonant motors), Piezo Stepping Motors and Inertia Motors. Piezo Motors are intrinsically vacuum compatible, non-magnetic and self locking at rest. Compared to classical piezo drives they are not limited in travel.

Magnetic Linear Motors / Piezo Linear Motors - pi-usa.us

Motor performance data can be recorded in the system database for comparison and statistical analysis. Motor power switching is done automatically by the system.

Stepper Motors and Encoders - Data Sheet - National

An electric motor is an electrical machine that converts electrical energy into mechanical energy. An electric generator operates in the reverse direction, converting mechanical energy into electrical energy.. Most electric motors operate through the interaction between the motor's magnetic field and winding currents to generate force. In certain applications, such as in regenerative braking ...
