

system integration and test pdf

Software system integration testing. For software SIT is part of the software testing life cycle for collaborative projects. Usually, a round of SIT precedes the user acceptance test (UAT) round. Software providers usually run a pre-SIT round of tests before consumers run their SIT test cases.

System integration testing - Wikipedia

System under test (SUT) refers to a system that is being tested for correct operation. According to ISTQB it is the test object. The term is used mostly in software testing. [citation needed]A special case of a software system is an application which, when tested, is called an application under test.. The term SUT means also a stage of maturity of the software because a system test is the ...
