Palm oil, produced from the oil palm, is a basic source of income for many farmers in South East Asia, Central and West Africa, and Central America. It is locally used as a cooking oil, exported for use in many commercial food and personal care products and is converted into biofuel.

Social and environmental impact of palm oil - Wikipedia

In sociology, a social system is the patterned network of relationships constituting a coherent whole that exist between individuals, groups, and institutions. The term refers to the formal structure of role and status that can form in a small, stable group. An individual may belong to multiple social systems at once; examples of social systems include nuclear family units, communities, cities ...
