Newton took space to be more than relations between material objects and based his position on observation and experimentation. For a relationist there can be no real difference between inertial motion, in which the object travels with constant velocity, and non-inertial motion, in which the velocity changes with time, since all spatial measurements are relative to other objects and their motions.

White-space characters: Null, Horizontal tab, Line feed, Form feed, Carriage return and Space. Tip: If you need to remember them, imagine seeing them in sequence (except for null of course) being typed on an imaginary typewriter. White-space characters separate names and other objects from each other. Interestingly, PDF treats all white-space characters outside a comment, string or stream the ...
