This disambiguation page lists articles associated with the title Normalization. If an internal link led you here, you may wish to change the link to point directly to the intended article.

Normalization - Wikipedia

Description of Normalization Thus Normalization is the process of organizing and designing a data model to efficiently store data in a database.

Concept of normalization and the most common normal forms.

In statistics and applications of statistics, normalization can have a range of meanings. In the simplest cases, normalization of ratings means adjusting values measured on different scales to a notionally common scale, often prior to averaging. In more complicated cases, normalization may refer to more sophisticated adjustments where the intention is to bring the entire probability ...

Functional dependency (FD) is a set of constraints between two attributes in a relation. Functional dependency says that if two tuples have same values for attributes A_1, A_2, \dots, A_n , then those two tuples must have to have same values for attributes B_1, B_2, \dots, B_n . Functional dependency is ...
