

wine production technology in pdf

Fruit wine can be made from virtually any plant matter that can be fermented. Most fruits and berries have the potential to produce wine. There are a number of methods of extracting flavour and juice from the fruits or plants being used, pressing the juice, stewing and fermenting the pulp of the fruits are common. Few foods other than grapes have the balanced quantities of sugar, acid, tannin ...

Fruit wine - Wikipedia

Wine is an alcoholic beverage made from grapes fermented without the addition of sugars, acids, enzymes, water, or other nutrients.. Yeast consumes the sugar in the grapes and converts it to ethanol and carbon dioxide. Different varieties of grapes and strains of yeasts produce different styles of wine. These variations result from the complex interactions between the biochemical development of ...
